According to the Cartagena Protocol, do you need to register national biosafety information in the Biosafety Clearing House? Do you want to know what is the basic data required for this, and what functionalities offers the BCH management center to facilitate this task? In this online seminar you will know what are the available national types of information, and you will master the basic mechanisms to access the BCH Management Centre and to register information in the BCH. You will learn how to create, edit, review and publish information in the BCH, and how to later update or even withdraw it from the web. In this seminar you will also learn what are the available reference information types – not national -, how to create and publish them, and what are the applicable procedures to do so.

Date: October 24th, 2018

Time: 1:00 PM – 2:00 PM GMT+0 – UTC (you can display it in your local time while registering)

After registering you will receive a confirmation email with the required information to join the webinar and check system requirements (you can join our session by using a Mac, PC or a mobile device). You'll be able to add this event to your calendar.
