Subject: submit information related to engineered gene drives and living modified fish

It is well recalled that the secretariat has requested us to submit information related to engineered gene drives and living modified fish. In line with this, Ethiopia has not yet started working on engineered gene drives and living modified fish, hence no experience in the area. However, Ethiopia needs proper training and experience share on the risk assessment and management of engineered gene drives and living modified fish for our future implementation.

Sincere yours

**Assefa Gudina Muleta**
